APPENDIX 9	800 MHz Transition Administrator, LLC Fees and Expenses through September 30, 2008

OVERVIEW

The 800 MHz Transition Administrator, LLC (“TA”) provides its Quarterly Progress Report to the Federal Communications Commission (“FCC”) regarding the progress of the reconfiguration of the 800 MHz band for the quarter ended September 30, 2008. Pursuant to the FCC’s *Reconfiguration Orders*,¹ the TA, as the manager of the reconfiguration effort, is required to report on a quarterly basis the progress of band reconfiguration.²

The band reconfiguration program generally consists of two broad stages of activity: the clearing of 806-809 MHz/851-854 MHz (Channels 1-120) and the relocation of Public Safety’s NPSPAC channel users to this vacated spectrum. There are two phases of reconfiguration for each of these stages – the negotiation phase that results in a Frequency Reconfiguration Agreement (“FRA”) between the licensee and Sprint Nextel and the implementation phase that consists of the physical reconfiguration of the radio systems.

Section I.A. of this report provides a program-wide “snapshot” summarizing the status of the band reconfiguration program. That section describes two measures of program progress: FRA negotiations and reconfiguration implementation. It also describes major developments in the program that occurred during the period covered by this report.

In addition, based on developments occurring during the third quarter, the TA makes the following general observations and recommendations that it believes will assist licensees participating in the program.

First, the TA encourages all parties in the reconfiguration process – licensees, vendors, consultants, and Sprint Nextel – to intensify their efforts to complete the remaining reconfigurations. All stakeholders must take note that the June 26, 2008 program completion deadline has passed and non-border licensees are conducting reconfiguration pursuant to an FCC waiver of that deadline. Because non-border licensees that are still involved in reconfiguration at this stage of the program are officially in “overtime,” they should focus on finishing reconfiguration as quickly as possible. Licensees that do not yet have an FRA should redouble their efforts to complete their planning activities, submit a cost estimate, and finish FRA

¹ Improving Public Safety Communications in the 800 MHz Band, *Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order, and Order*, 19 FCC Rcd 14969 (2004) (“*Report and Order*”); as amended by *Erratum*, WT Docket No. 02-55 (rel. Sept. 10, 2005); *Second Erratum*, 19 FCC Rcd 19651 (2004); “Commission Seeks Comment on *Ex Parte* Presentations and Extends Certain Deadlines Regarding the 800 MHz Public Safety Interference Proceeding,” *Public Notice*, 19 FCC Rcd 21492 (2004); *Third Erratum*, 19 FCC Rcd 21818 (2004); *Supplemental Order and Order on Reconsideration*, 19 FCC Rcd 25120 (2004) (“*Supplemental Order*”); *Erratum*, WT Docket No. 02-55 (rel. Jan. 19, 2005); *Memorandum Opinion and Order*, 20 FCC Rcd 16015 (2005) (“*Memorandum Opinion and Order*”); *Second Memorandum Opinion and Order*, 22 FCC Rcd 10467 (2007); *Erratum*, WT Docket No. 02-55 (rel. July 26, 2007); *Third Memorandum Opinion and Order*, 22 FCC Rcd 17209 (2007) (“*Third Memorandum Opinion and Order*”); “FCC Announces Supplemental Procedures and Provides Guidance for Completion of 800 MHz Rebanding,” *Public Notice*, 22 FCC Rcd 17227 (2007) (“*September 12, 2007 Public Notice*”); *Second Report and Order*, 23 FCC Rcd 7605 (2008) (“*Second Report and Order*”); *Erratum*, WT Docket No. 02-55 (rel. May 28, 2008) (collectively “*Reconfiguration Orders*”).

² 47 C.F.R. § 90.676(b)(3).

negotiations. The outstanding FRAs are delaying implementation in some regions, especially in places with extensive interoperability. In addition, the TA has not been able to hold an Implementation Planning Session (“IPS”) in those regions to develop a consolidated regional implementation schedule due to the delays in completing FRA negotiations. Licensees that are in the implementation phase should attend an IPS in their region and continue to move forward with and complete their implementation activities in accordance with the regional schedule developed at the IPS.

Second, the TA continues to actively monitor, track, and report on licensees’ reconfiguration implementation progress. The TA contacts licensees to get status updates, to determine if their implementation is proceeding as planned and on schedule, and to obtain information about issues which may affect their implementation activities or impede progress. The TA encourages licensees to be responsive to the TA’s requests for such information. Licensees are directed to the guidance on the TA’s website regarding licensee progress reporting.³ If a licensee encounters an implementation issue or a delay in its individual implementation schedule, it should inform the TA. The TA will be providing implementation reports to licensees in each region, which will include an updated regional implementation schedule. This will enable licensees in a region to continue to proceed with their implementation activities in a coordinated manner.

Third, delays between a licensee’s completion of reconfiguration implementation and closing of its FRA remain an issue. These delays include time spent to complete the Actual Cost Reconciliation (“ACR”) Process, filings with the FCC, and Completion Certifications. The length of the delays can range from a few months to more than a year. Additional information is available in Section II.B.5. of this report. The TA encourages licensees and Sprint Nextel to complete these activities in a more timely manner. The TA has developed an Actual Cost Reconciliation Webinar to enhance licensee understanding of the process from start to finish. Licensees are encouraged to register on the TA’s website for an upcoming ACR Webinar. There is an ACR Fact Sheet on the TA’s website that outlines documentation requirements.⁴ In addition, the TA has developed a Reconfiguration Completion Checklist, which assists licensees in understanding what is required from start to finish of the reconfiguration process.⁵ It is important that licensees fully understand the process and avoid prolonging their reconfigurations simply because of a misunderstanding of the process.

Fourth, the 30-month reconfiguration period for licensees in the U.S.-Canada border regions began on October 14, 2008. In the *Second Report and Order*, the FCC directed the TA to develop, by October 14, 2008, a detailed region-by-region timetable with sequential milestones for completion of each stage of the implementation process. The TA submitted its

³ The Licensee Progress Reports Fact Sheet is available at http://www.800TA.org/content/PDF/reconfiguration_materials/Licensee_Progress_Reporting.pdf.

⁴ The Actual Cost Reconfiguration Fact Sheet is available at http://www.800TA.org/content/PDF/reconfiguration_materials/Actual_Cost_Reconciliation_Fact_Sheet.pdf.

⁵ The Reconfiguration Completion Checklist is available on the TA’s website at http://www.800TA.org/content/PDF/reconfiguration_materials/reconfiguration_completion_checklist.pdf.

Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions (“Implementation Plan”) to the FCC on October 1, 2008.⁶ The FCC approved the TA’s Implementation Plan by an October 10, 2008 Public Notice.⁷ The Implementation Plan sets forth the timing and sequence for planning, negotiations, and implementation for Canadian border region licensees. The Implementation Plan establishes two stages for the reconfiguration of Canadian border licensees, based upon the type of licensee, rather than the frequencies a licensee will be reconfiguring. Stage 1 includes non-public safety licensees, such as Business Industrial Land Transportation (“B/ILT”) and Specialized Mobile Radio (“SMR”) licensees. Stage 2 is comprised of both NPSPAC and non-NPSPAC public safety licensees.

In addition to developing the Implementation Plan, the TA started the process of Canadian border region reconfiguration during the third quarter by determining replacement frequency proposals, publishing guidance for licensees and updated forms on its website, meeting with affected licensees, and preparing for the mediation period. The TA mailed Frequency Proposal Reports (“FPRs”) to Stage 1 Canadian border region licensees in October 2008. The TA met with Canadian border region licensees in Ohio, Michigan, and New York to discuss the band plan and the reconfiguration process.

Canadian border region licensees seeking planning funding were required to submit a Request for Planning Funding (“RFPF”) by the October 14, 2008 deadline established by the FCC in the *Second Report and Order*. Licensees that submit an RFPF after October 14, 2008 must request an extension of this deadline from the FCC. Licensees submitting RFPFs that did not have a Planning Funding Agreement (“PFA”) by October 14, 2008 were placed into an expedited negotiation and mediation process. For those licensees that do not require a PFA, the TA, as directed by the FCC,⁸ announced applicable negotiation schedules in the Implementation Plan. The TA encourages Canadian border region licensees to move forward with their planning or negotiation activities (as applicable) and to contact the TA if they require assistance as they advance through the reconfiguration process.

⁶ 800 MHz Transition Administrator, LLC, Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions, WT Docket No. 02-55 (filed Oct. 1, 2008), *available at* http://www.800TA.org/content/PDF/other/Implementation_Plan_and_Timetable_CBR.pdf (“Implementation Plan”).

⁷ “Public Safety and Homeland Security Bureau Announces that the 30-Month Transition Period for 800 MHz Band Reconfiguration in Regions Along the U.S.-Canada Border will Commence on October 14, 2008,” *Public Notice*, WT Docket No. 02-55, DA 08-2280 (rel. Oct. 10, 2008) (“*Canadian Border Public Notice*”).

⁸ See *Second Report and Order* at ¶ 42.

I. PROGRAM-WIDE SNAPSHOT AND RECENT DEVELOPMENTS

This section of the Quarterly Progress Report provides a program-wide snapshot that summarizes the status of the 800 MHz band reconfiguration program, discusses recent developments, identifies program-wide issues, and describes specific actions that the FCC and the TA have taken to address issues identified to date.

A. Program Wide Snapshot

1. Frequency Reconfiguration Agreement (“FRA”) Negotiations

The TA generally measures the progress of Frequency Reconfiguration Agreement (“FRA”) negotiations in two ways: (1) the number of FRAs that have been negotiated and agreed to between incumbent licensees and Sprint Nextel and submitted to the TA; and (2) the number of *call signs* included in those FRAs.

An FRA specifies the reconfiguration activities and related costs for each licensee as well as the frequencies to be cleared. The bar chart below depicts the number of non-border FRAs that have been negotiated and submitted to the TA for Stage 1 (Channels 1-120 and Southeast ESMR channels) licensees and Stage 2 (NPSPAC and Public Safety Expansion Band) licensees.

Chart 1: Non-border FRAs Submitted to the TA as of September 30, 2008⁹

- Stage 1: 99 percent of non-border FRAs have been submitted to the TA
- Stage 2: 78 percent of non-border FRAs have been submitted to the TA (an increase from 72 percent as of June 30, 2008)

⁹ Sprint Nextel is the data source for the number of expected FRAs. The estimate of total FRAs does not currently include all FRAs for licensees affected by the international border areas for Canada and Mexico.

For the program as a whole, 1,591 FRAs have been submitted to the TA out of a total of 1,787 FRAs expected for non-border licensees in Stages 1 and 2. This equates to 89 percent of all expected FRAs (an increase from 86 percent as of June 30, 2008).

Another indication of progress is the number of FCC licenses (each license has a unique call sign) included in FRAs. The chart below shows the number of call signs with frequencies in the Channels 1-120 and NPSPAC bands included in FRAs submitted to the TA.

Chart 2: Call Signs in Submitted FRAs by Band¹⁰

The relatively greater number of outstanding Channels 1-120 call signs not in FRAs shown in this chart, as compared to the number of outstanding FRAs, reflects the significant number of call signs to be reconfigured that are located in, or affected by, the Canadian and Mexican border areas. For NPSPAC, the difference is again the border factor (both Canadian and Mexican) as well as an indication that a number of the outstanding non-border FRAs are for large systems with multiple call signs.

2. Reconfiguration Implementation

The TA generally measures the status of reconfiguration implementation (physical reconfiguration) progress in two ways: (1) the number of *FRAs* for which reconfiguration implementation is complete; and (2) the number of *call signs* that Sprint Nextel reports as being cleared by licensees.¹¹

¹⁰ This chart includes call signs within the Canadian and Mexican border regions. Data is based on the FCC's Universal Licensing System ("ULS") database. This chart does not include Expansion Band call signs.

¹¹ Cleared means that the licensee has retuned its base stations to its new channel assignments and commenced system operations on the new channels.

The bar chart below depicts the number of non-border FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical reconfiguration is complete.

Chart 3: Non-border FRAs with Reconfiguration Implementation Complete

With Sprint Nextel reporting that physical reconfiguration is complete for 95 percent of non-border Channels 1-120 FRAs, Stage 1 is nearing completion, except for the border areas. 63.8 percent of the Stage 1 site-specific call signs were reported by Sprint Nextel as being cleared by licensees as of September 30, 2008. The difference between the numbers by percentages of *call signs* compared to the numbers by percentages of *FRAs* is because the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas.¹²

NPSPAC reconfiguration implementations often involve complex system designs and interoperability requirements among numerous licensees in a region and generally require more time and coordination than was needed for Stage 1. Stage 2 implementation continues to see steady progress. During the third quarter, there were an additional 63 Stage 2 FRAs for which licensees reported their physical retunes as complete. As of September 30, 2008, there were 261 FRAs (30 percent) for which non-border Stage 2 licensees had completed their physical retunes and transitioned to their new channels. 10.5 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees as of September 30, 2008. The retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels is a significant milestone because it means that the main goal of the reconfiguration process – separating Public Safety and commercial cellular operations – has been achieved.

¹² There are also a small number of call signs in Wave 1 and 2 that are in the FCC-defined border areas that are not included in FRA data.

B. Recent Developments

1. Requests for Waiver of June 26, 2008 Deadline

In response to the FCC's January 17, 2008 Public Notice¹³ directing non-border licensees that require additional time past June 26, 2008 to complete rebanding to request a waiver of the deadline, 724 requests for waiver have been filed with the FCC's Public Safety and Homeland Security Bureau ("PSHSB") as of September 30, 2008. The TA has created a webpage that provides information on the requests for waiver received by the TA. The link to this page can be found on the TA's website at http://www.800TA.org/content/documents/waiver_requests.asp.

Licensees that were unable to propose a specific implementation timetable because they had not completed FRA negotiations as of the filing deadlines filed requests for "interim" waiver. In its June 17, 2008 Orders, the PSHSB generally granted the interim requests, conditioned on the licensee filing a supplemental waiver request by July 18, 2008.¹⁴ Many licensees filed supplemental requests for waiver in July 2008.

The remaining licensees have an executed FRA and filed "standard" requests for waiver requesting various dates for completing their reconfiguration implementation, ranging from a few months to a few years beyond June 2008. For the standard requests for waiver, the PSHSB generally granted waivers until July 1, 2009.¹⁵ Licensees are expected to complete their reconfiguration activities in accordance with the implementation schedule proposed in their request for waiver, and any changes to this schedule should be communicated to the FCC and the TA.

The table below contains statistics about the requests for waiver.

Table 1: Requests for Waiver of the June 26, 2008 Deadline, as of September 30, 2008

Wave	Total Number of Requests	Interim	Interim Supplemental¹⁶	Standard	Standard Supplemental
1	247	75	21	172	31
2	158	65	32	93	5
3	267	122	62	145	17
4	52	21	10	31	5
Total Requests	724	283	125	441	58

¹³ See "Federal Communications Commission Provides Guidance for Submission of Requests for Waiver of June 26, 2008 Deadline for Completion of 800 MHz Rebanding," *Public Notice*, 23 FCC Rcd 664 (2008).

¹⁴ See e.g., Improving Public Safety Communications in the 800 MHz Band; Requests for Interim Waiver of the June 26, 2008 Rebanding Deadline – Wave 1 Public Safety Regions, WT Docket No. 02-55, *Order*, DA 08-1427 (rel. June 17, 2008).

¹⁵ See e.g., Improving Public Safety Communications in the 800 MHz Band; Requests for Waiver of the June 26, 2008 Rebanding Deadline – Wave 1 Public Safety Regions, WT Docket No. 02-55, *Order*, DA 08-1428 (rel. June 17, 2008).

¹⁶ Supplemental filings for Interim or Standard Requests for Waiver are made by licensees to update requested dates or provide additional information regarding their original Request for Waiver filing.

With regard to Sprint Nextel's June 17, 2008 Petition for Relief seeking to remain on its 800 MHz Interleaved Band (809-815/854-860 MHz), Expansion Band (815-816/860-861 MHz), and Guard Band (816-817/861-862 MHz) (collectively, the "Mid-Band") channels beyond June 26, 2008, the FCC released an Order on October 30, 2008 granting a waiver allowing Sprint Nextel to relinquish its Mid-Band spectrum in stages, tied to the rebanding progress of NPSPAC licensees in each NPSPAC region.¹⁷ The FCC set a deadline of March 31, 2010 by which Sprint Nextel must relinquish all of its non-border Interleaved Band spectrum. The FCC tasked the TA with monitoring the clearing process.

2. Puerto Rico Band Plan

On June 30, 2008, the PSHSB adopted a "Second Further Notice of Proposed Rule Making" that sought comment on proposals for establishing a reconfigured 800 MHz band plan in Puerto Rico.¹⁸ The PSHSB sought comment on the alternative band plan and negotiation timetable that the TA proposed in an October 19, 2007 filing and on potential alternatives. Comments were filed on August 8, 2008 and reply comments were filed on August 22, 2008.

3. Sprint Nextel's Monthly Reports

The FCC's *Third Memorandum Opinion and Order* required Sprint Nextel to file monthly reports with the FCC and the TA on its clearing of Channels 1-120 spectrum.¹⁹ During the third quarter, Sprint Nextel filed reports on July 1, August 1, and September 2, 2008. Sprint Nextel also filed a report on October 1, 2008, in which it reported that it has cleared all non-Sprint Nextel, non-SouthernLINC incumbent licensees from Channels 1-120 in 47 NPSPAC regions (unchanged since July 1, 2008) and that more than 97 percent of Stage 1 licensees have been retuned.²⁰ Sprint Nextel reported that of the nine remaining NPSPAC regions or U.S. Territories, seven of these regions have three or fewer Channels 1-120 licensees that remain to be retuned. For Stage 2, Sprint Nextel's October report provided a list of 269 NPSPAC licensees (up from 234 licensees as of July 1, 2008) that have agreed upon a date with Sprint Nextel by which Sprint Nextel will clear Channels 1-120 and have established with Sprint Nextel a firm date for starting and completing their physical retuning work and noted that many have finished their retunes.

¹⁷ See Improving Public Safety Communications in the 800 MHz Band, Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, WT Docket No. 02-55, *Order*, FCC 08-253 (rel. Oct. 30, 2008).

¹⁸ Improving Public Safety Communications in the 800 MHz Band, WT Docket 02-55, *Second Further Notice of Proposed Rule Making*, DA 08-1530 (rel. June 30, 2008).

¹⁹ See *Third Memorandum Opinion and Order* at ¶¶ 29-31. The reports must include the following information: (1) the number of licensees that have been cleared from Channels 1-120 and the number that remain to be cleared; (2) the number of Channels 1-120 frequencies being used by Sprint Nextel in its own network and the number it has vacated; and (3) information regarding requests by NPSPAC licensees for Sprint Nextel to vacate Channels 1-120 frequencies.

²⁰ See Sprint Nextel Corporation, "Sprint Nextel's Status Report on 800 MHz Band Reconfiguration," WT Docket No. 02-55, at 1 (filed October 1, 2008).

4. Border Areas

a. Canada

On May 9, 2008, the FCC released a *Second Report and Order* that established a reconfigured 800 MHz band plan in the U.S.-Canada border regions. The FCC established a 30-month transition period, of which the planning and negotiation process is expected to take approximately seven to eight months and implementation would take approximately 22 to 23 months. On October 10, 2008, the FCC issued a Public Notice announcing that the 30-month transition period would begin on October 14, 2008 and end on April 14, 2011.²¹

The FCC directed the TA to develop, by October 14, 2008, a more detailed region-by-region timetable with sequential milestones for completion of each stage of the implementation process. The TA submitted its Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions (“Implementation Plan”) to the FCC on October 1, 2008.²² The PSHSB approved the TA’s proposed Implementation Plan in the October 10, 2008 Public Notice.²³ The Implementation Plan sets forth the timing and sequence for planning, negotiations, and implementation for Canadian border region licensees. It establishes two stages for the reconfiguration of Canadian border licensees, based upon the type of licensee, rather than the frequencies a licensee will be reconfiguring. Stage 1 includes non-public safety licensees, such as Business Industrial Land Transportation (“B/ILT”) and Specialized Mobile Radio (“SMR”) licensees. Stage 2 is comprised of both NPSPAC and non-NPSPAC public safety licensees. The table below shows the key dates for reconfiguration in the Canadian border regions.

Table 2: Key Dates for Canadian Border Region Reconfiguration

Licensee Stage / Planning Funding Requested	RFPF Latest Submission Date	PFA Planning Start Date/ TA Designated Date	Cost Estimate Due Date – Licensees with ≤5,000 Units	Cost Estimate Due Date – Licensees with 5,001 to 10,000 Units	Cost Estimate Due Date – Licensees with >10,000 Units
Stage 1 or 2 – Licensees Requesting Planning Funding	10/14/2008	The later of TA approval of the PFA, or receipt of FPR(s)	90 Days from the planning start date	100 Days from the planning start date	110 Days from the planning start date
Stage 1 – Licensees without PFAs	N/A	10/14/2008	1/12/2009	1/22/2009	2/1/2009
Stage 2 – Licensees without PFAs	N/A	1/15/2009	4/15/2009	4/27/2009	5/5/2009

²¹ See *Canadian Border Public Notice*.

²² See *Implementation Plan*.

²³ See *Canadian Border Public Notice*.

Licensees in the Canadian border regions and licensees adjacent to the border regions that have not previously received replacement frequencies will be receiving a Frequency Proposal Report (“FPR”) from the TA that will identify their frequencies designated for reconfiguration and detail their proposed replacement frequencies. The TA mailed FPRs to Stage 1 licensees in October 2008. The TA is currently analyzing replacement frequencies for Stage 2 licensees. To identify the most appropriate replacement frequencies for Stage 2 licensees, the TA will coordinate information gathering and planning with the NPSPAC Regional Planning Committees, public safety licensees, and Sprint Nextel.

Stage 1 or 2 licensees requesting planning funding were required to submit an RFPF by October 14, 2008 and negotiate a PFA with Sprint Nextel. Licensees that submit an RFPF after October 14, 2008 must request an extension of this deadline from the FCC. As of September 30, 2008, 20 PFAs, with a total contract value of \$5.5 million, were submitted to the TA by licensees in the Canadian border region or adjacent to the border regions. Licensees submitting RFPFs that did not have a PFA by October 14, 2008 were placed into an expedited negotiation and mediation process pursuant to procedures set forth in the FCC’s *Second Report and Order* and in the TA’s Alternative Dispute Resolution (“ADR”) Plan.²⁴ The licensee and Sprint Nextel have an additional 30 days from October 14, 2008 to continue PFA negotiations under the monitoring of a TA mediator. If, at the end of the 30 day period, there is no agreement on a PFA, the licensee and Sprint Nextel will participate in active mediation for 20 days. After reaching agreement on a PFA, such licensees will be required to complete planning and submit a cost estimate within 90 to 110 days, depending on the number of subscriber units in their system, of the later of TA approval of the PFA or receipt of an FPR. Licensees should commence their planning activities *prior to receiving their FPRs* and can perform certain non-frequency-dependent planning activities, such as conducting inventory and non-frequency-specific engineering and implementation planning.

The TA’s Implementation Plan designated October 14, 2008 as the official planning start date for Stage 1 licensees that do not require a PFA. Such licensees should begin planning activities and submit a cost estimate for their reconfiguration to Sprint Nextel within 90 to 110 days, depending on the number of subscriber units in their system. Specific cost estimate due dates appear in Table 2 above.

The TA encourages Stage 2 licensees that do not require a PFA to start their planning early and prior to the commencement of the official planning start date of January 15, 2009. Such licensees should commence their planning activities prior to receiving their FPRs and can perform certain non-frequency-dependent planning activities, such as conducting inventory and non-frequency-specific engineering and implementation planning.

Once a licensee’s planning is complete and a cost estimate is submitted to Sprint Nextel, the licensee and Sprint Nextel have 30 days for FRA negotiations. If they are unable to negotiate an FRA within 30 days, the parties will participate in active mediation for 20 days.

²⁴ See *Second Report and Order* at ¶ 40; see also 800 MHz Transition Administrator, LLC, Alternative Dispute Resolution Plan (version 1.6), WT Docket No. 02-55, at 20-21 (filed June 23, 2008) (“*ADR Plan*”).

b. **Mexico**

The band plan for the U.S.-Mexico border region is still under development. Accordingly, the FCC issued a Public Notice on October 1, 2008 modifying the schedule for border area non-NPSPAC (Stage 1) and NPSPAC (Stage 2) licensees in the U.S.-Mexico border region.²⁵ The FCC extended the negotiation period until January 1, 2009 and postponed the start of the mediation period until January 2, 2009 for such licensees. The FCC also extended the filing freeze on new applications in the U.S.-Mexico border region until February 13, 2009.

During the extended negotiation periods, the FCC has encouraged Wave 4 licensees affected by the Mexican border region to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs.²⁶ If planning funding is required, licensees will need to submit a Request for Planning Funding to the TA and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies. As of September 30, 2008, 8 PFAs, with a total contract value of \$4.1 million, were submitted to the TA by licensees in the Mexican border region or adjacent to the border regions.

²⁵ See “Public Safety and Homeland Security Bureau Extends 800 MHz Rebanding Negotiation Period for Wave 4 Border Area NPSPAC and Non-NPSPAC Licensees Along the U.S.-Mexico Border,” *Public Notice*, WT Docket No. 02-55, DA 08-2218 (rel. Oct. 1, 2008).

²⁶ See *id.*

II. QUARTERLY UPDATE

This section highlights the key areas within each wave and provides financial and support information about the program.

A. Wave Update

This section presents further detail about the status of negotiations and reconfiguration implementation for licensees. The pace of progress in implementing reconfiguration of Stage 1 systems has a direct effect on the pace of reconfiguration for Stage 2 systems. Stage 1 licensees must be relocated off their frequencies in the lower 1-120 channel portion of the 800 MHz band, before Stage 2 NPSPAC licensees can move to their new frequencies in that portion of the 800 MHz band. This interdependency of reconfiguration progress between Stages 1 and 2 is consistent across all four waves.

1. Stage 1 (Channels 1-120)

a. Planning and Negotiations

Most Stage 1 licensees included planning costs (if any) in their FRAs, but some negotiated Planning Funding Agreements (“PFAs”) with Sprint Nextel. As of September 30, 2008, 55 PFAs, with a total contract value, including amendments, of \$7.6 million, were submitted to the TA for non-border Stage 1 licensees.²⁷

The negotiation of Stage 1 Frequency Reconfiguration Agreements is virtually completed, largely with the exception of border area licensees. As of September 30, 2008, 908 FRAs (99 percent) have been submitted to the TA out of the 916 FRAs anticipated for Stage 1 licensees in all waves. The contract value of these FRAs, including amendments, totals \$75.8 million.

In Stage 1, there were a total of six mediation dockets (or “cases”) pending as of September 30, 2008 out of the 487 mediation dockets opened for Stage 1 licensees. This includes two mediations in Wave 3 and four in Wave 4.²⁸ The pending mediation dockets fall into one of the following categories: (1) the mediation resulted in a PFA with an FRA still to be negotiated upon the completion of the planning contemplated by the PFA; or (2) the parties reached agreement, but had not yet executed an FRA. As of September 30, 2008, 17 Stage 1 mediations (3.5 percent) had been referred to the FCC for *de novo* review, of which eight were settled by the parties prior to a decision by the FCC.

²⁷ Stage 1 PFA counts and total contract value appear lower than what was reported in the Quarterly Progress Report for the Quarter Ended June 30, 2008. This is due to 7 PFAs with a total contract value of \$2.7 million now being reported as border region PFAs.

²⁸ The remaining mediation dockets in Wave 4 include several Wave 3, Stage 1 licensees whose Gulf Coast Wave Change Requests were granted in June 2006, resulting in the licensee’s negotiations and reconfiguration implementation being moved to Wave 4, Stage 1.

b. **Reconfiguration Implementation**

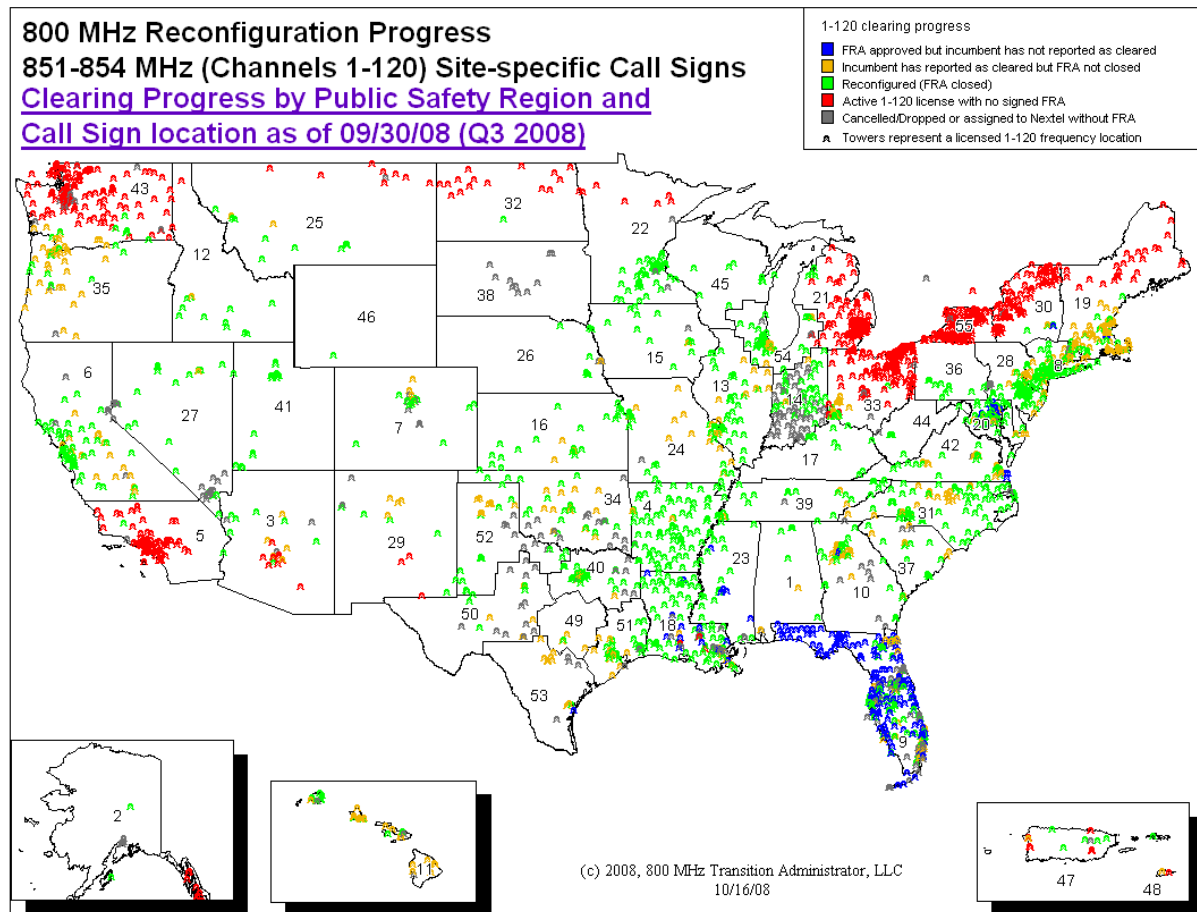

As of September 30, 2008, Sprint Nextel reported that physical reconfiguration is complete for 871 Stage 1 FRAs out of the 916 FRAs anticipated for Stage 1, which is 95 percent of non-border Channels 1-120 FRAs (an increase from 94 percent as of June 30, 2008). Only 45 non-border Stage 1 FRAs have not completed physical reconfiguration.

As of September 30, 2008, 63.8 percent (up from 63.4 percent as of June 30, 2008) of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees. The difference between the numbers by percentages of call signs compared to the numbers by percentages of FRAs is because the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas.²⁹ As of September 30, 2008, there were 30 NPSPAC regions that reported that 100 percent of the Channels 1-120 call signs were cleared.

Map 1 below shows the progress of clearing Channels 1-120 to allow relocation of the NPSPAC band, with significant progress in all areas of the country outside the areas affected by international borders.

²⁹ There are also a small number of call signs in Wave 1 and 2 that are in the FCC-defined border areas that are not included in FRA data.

Map 1: Channels 1-120 Locations and Reconfiguration Status, by NPSPAC Region as of September 30, 2008³⁰

2. Stage 2 (NPSPAC and Public Safety Expansion Band)

a. Planning and Negotiations

In Stage 2, nearly half of the licensees sought planning funding and negotiated PFAs. As of September 30, 2008, 424 PFAs, with a total contract value, including amendments, of \$69.1 million,³¹ were submitted to the TA for Stage 2 licensees.

³⁰ The licensee clearing information is provided by Sprint Nextel. Some regions adjacent to international borders will not reach 100 percent until revised border area band plans are available. Locations noted on the map are based upon ULS data regarding Channels 1-120 licensing as of November 2004.

³¹ Eight additional PFAs with a total contract value of \$1.1 million were submitted to the TA during the quarter ending September 30, 2008. The number of Stage 2 PFAs and their dollar value noted above appear to be lower than those reported in the last quarterly report because 21 Stage 2 PFAs are now being reported within the category of border region PFAs.

Progress continues to be made in the negotiation of FRAs for Stage 2 licensees. During the third quarter of 2008, parties completed negotiations on and submitted to the TA an additional 58 Stage 2 FRAs. As shown in the table below, as of September 30, 2008, 683 FRAs (78 percent) have been submitted to the TA out of the 871 FRAs anticipated for non-border Stage 2 licensees in all waves. The contract value of these FRAs, including amendments, totals \$370.8 million.

Table 3: Status of Reconfiguration for Stage 2 (NPSPAC and Public Safety Expansion Band) Licensees as of September 30, 2008 (milestones achieved by number of FRAs)³²

Wave	Stage 2 Anticipated FRAs*	FRA Negotiations and Approval			Reconfiguration Implementation				
		FRAs Submitted to TA	FRAs Approved by TA	% of Anticipated FRAs Approved by TA	# of FRAs with Physical Retunes Reported as Completed	% of Anticipated FRAs with Physical Retune Reported as Completed	Completion Certifications Submitted to TA	Completion Certifications Verified by TA	% of Anticipated FRAs with Completion Certifications Verified by TA
Wave 1	352	292	287	82%	123	35%	32	29	8%
Wave 2	230	198	195	85%	98	43%	37	34	15%
Wave 3	240	161	159	66%	27	11%	8	7	3%
Wave 4	49	32	32	65%	13	27%	3	3	6%
Total	871	683	673	77%	261	30%	80	73	8%

* This table does not include any estimate of deals that will include call signs in or affected by the FCC-defined border areas.

³² Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated). For Wave 3, Stage 2, the number of expected FRAs will increase as additional FRAs are reached with Wave 3 Southeast ESMR Band licensees who were deferred from Wave 3, Stage 1 to Wave 3, Stage 2 and those deals are added to the count. Given that some FRAs noted in the table are for licensees with mobile-only systems, there will be a difference between the number of FRAs and the number of FRAs reporting frequencies cleared.

Table 4: Status of Reconfiguration for Licensees in Stage 2 (NPSPAC and Public Safety Expansion Band) as of September 30, 2008 (milestones achieved by number of call signs)

Wave	Stage 2 Call Signs *	FRA Negotiations and Approval			Reconfiguration Implementation				
		# in FRAs Submitted to TA	# in FRAs Approved by TA	% in FRAs Approved by TA	# Reported as Cleared by Licensee	% Reported as Cleared by Licensee	Completion Certifications Submitted to TA	Completion Certifications Verified by TA	% with Completion Certifications Verified by TA
Wave 1	2175	1652	1568	72%	390	18%	27	25	1%
Wave 2	935	455	437	47%	166	18%	18	18	2%
Wave 3	1137	500	353	31%	57	5%	12	12	1%
Wave 4	1843	219	193	11%	25	1%	8	8	0.4%
Total	6090	2826	2551	42%	638	10%	65	63	1%

* Includes call signs in the FCC-defined international border areas.

The mediation process has proven successful in aiding licensees and Sprint Nextel in reaching agreements. As of September 30, 2008, only 49 Stage 2 mediations (5.4 percent) had been referred to the FCC for *de novo* review, of which thirteen were settled by the parties prior to a decision by the FCC.

(i) **Wave 1**

Wave 1, Stage 2 is the largest of the NPSPAC channel reconfiguration waves, with 352 FRAs expected to be negotiated between Sprint Nextel and Public Safety agencies. As shown in Table 3 above, as of September 30, 2008, approximately 82 percent of the FRAs expected for Wave 1, Stage 2 have been approved by the TA.

The Wave 1, Stage 2 mediation period began on November 1, 2006. As of September 30, 2008, of the 333 mediation dockets opened for Wave 1, Stage 2 licensees, 270 mediation dockets had been resolved (an increase from 259 resolved as of June 30, 2008). The parties in 50 mediations had negotiated PFAs and were in various stages of planning; 10 of these had reached agreement but had not yet executed FRAs. The parties in one other mediation in which the licensee did not have a PFA had also reached agreement but had not yet executed an FRA. Seven mediation dockets were the subject of Recommended Resolutions pending before the FCC for *de novo* review. Three mediation dockets were the subject of orders issued by the PSHSB and were being reviewed by the full Commission.

(ii) **Wave 2**

As shown in Table 3 above, as of September 30, 2008, approximately 85 percent of the FRAs expected for Wave 2, Stage 2 have been approved by the TA.

The Wave 2, Stage 2 mediation period began on February 1, 2007. As of September 30, 2008, of the 233 mediation dockets opened for Wave 2, Stage 2 licensees, 201 mediation dockets had been resolved (an increase from 190 resolved as of June 30, 2008). The parties in 28 mediations had negotiated PFAs and were in various stages of planning; eight of these had reached agreement but had not yet executed FRAs. The parties in one other mediation in which the licensee did not have a PFA had also reached agreement but had not yet executed an FRA. Two mediation dockets were the subject of Recommended Resolutions pending before the FCC for *de novo* review. The parties in one mediation docket were in the process of negotiating an FRA following *de novo* review by the FCC.

(iii) **Wave 3**

Besides NPSPAC licensees, Wave 3, Stage 2 includes certain licensees with Southeast ESMR Band frequencies that were deferred from Wave 3, Stage 1 at the licensee's request.³³ As shown in Table 3 above, as of September 30, 2008, approximately 66 percent of the FRAs expected for Wave 3, Stage 2 have been approved by the TA.

The Wave 3, Stage 2 mediation period began on May 1, 2007. As of September 30, 2008, of the 272 mediation dockets opened for Wave 3, Stage 2 licensees, 187 mediation dockets had been resolved (an increase from 158 resolved as of June 30, 2008).³⁴ The parties in 77 mediations had negotiated PFAs and were in various stages of planning; 25 had reached agreement but had not yet executed FRAs. The parties in three other mediations in which the licensees did not have PFAs had also reached agreement but had not yet executed FRAs. One mediation docket was the subject of a Recommended Resolution pending before the FCC for *de novo* review.

(iv) **Wave 4**

As shown in Table 3 above, as of September 30, 2008, approximately 65 percent of the non-border area FRAs expected for Wave 4, Stage 2 have been approved by the TA.

The Wave 4, Stage 2 mediation period for non-border area licensees began on August 1, 2007. As of September 30, 2008, of the 66 mediation dockets opened for Wave 4, Stage 2 licensees, 43 mediation dockets had been resolved (an increase from 40 resolved as of June 30, 2008). The parties in 19 mediations had negotiated PFAs and were in various stages of planning; five had reached agreement but had not yet executed FRAs. In addition, the parties in one mediation docket had reached agreement on terms but not yet executed a PFA. No mediations were referred to the FCC for *de novo* review.

³³ Wave 3, Stage 1 licensees whose Wave 3 ESMR Negotiation Deferral Requests were granted in June 2006 had their negotiations and reconfiguration implementation deferred to Wave 3, Stage 2.

³⁴ The difference between the number of mediation dockets and the number of expected FRAs for Wave 3, Stage 2 is largely due to certain deals with Wave 3 Southeast ESMR Band licensees who were deferred from Wave 3, Stage 1 to Wave 3, Stage 2 not being included in the number of expected FRAs. The number of expected FRAs for Wave 3, Stage 2 will increase as additional FRAs are reached with such licensees and those deals are added to the count.

Wave 4, Stage 2 licensees with systems located in, or affected by, the international border areas with Mexico and Canada have not yet received replacement frequency proposals from the TA and the expected FRAs for such licensees are not included in the FRA statistics for Wave 4.

b. **Reconfiguration Implementation**

There continues to be steady progress in reconfiguration implementation by Stage 2 licensees. A number of NPSPAC licensees are moving forward with and completing their implementation activities and are helping to define an implementation framework that can serve as a model for other NPSPAC licensees.

(i) **Implementation Planning Sessions**

One of the TA's methods for facilitating implementation activities has been to conduct regional Implementation Planning Sessions ("IPS" or "sessions"). These sessions bring together NPSPAC and interoperable Expansion Band licensees, their equipment vendors, technical consultants, and Sprint Nextel to develop consolidated implementation schedules. The FCC has stated that NPSPAC licensees "are expected to participate" in an IPS.³⁵

During the sessions, the TA works with licensees to develop implementation schedules for the regions that identify key milestones and dependencies associated with reconfiguration implementation activities. This is particularly important because many FRAs for NPSPAC licensees do not contain firm implementation dates. The sessions help licensees adjust implementation schedules to deal with complicated interconnections and interdependencies of shared networks – particularly regarding setting dates for retuning mutual aid channels used by neighboring municipalities. IPS have also been successful in enabling parties to reach an understanding on the timing of clearing and surrendering frequencies for those licensees that are ready to transition to the new channels.

During the third quarter, the TA conducted two sessions in Region 9: Florida. As of September 30, 2008, the TA had conducted 26 IPS in 21 NPSPAC regions that were attended by 348 licensees operating more than 822,000 radios.³⁶ The TA will continue to hold sessions for all waves and follow-up sessions when needed. The TA encourages licensees to attend and participate in IPS in their region.

(ii) **Reconfiguration of Subscriber Equipment**

A key component of reconfiguration implementation is the retuning, reflashing, and/or replacement of subscriber equipment. As of September 30, 2008, Stage 2 licensees had retuned, reflashed, or replaced approximately 312,000 radios.

³⁵ See September 12, 2007 Public Notice at 4.

³⁶ The TA had conducted 15 IPS in Wave 1 NPSPAC regions attended by 162 licensees, 8 IPS in Wave 2 NPSPAC regions attended by 121 licensees, and 3 IPS in Wave 3 NPSPAC regions attended by 65 licensees. The TA is currently gathering and analyzing information to assess future IPS for Wave 4.

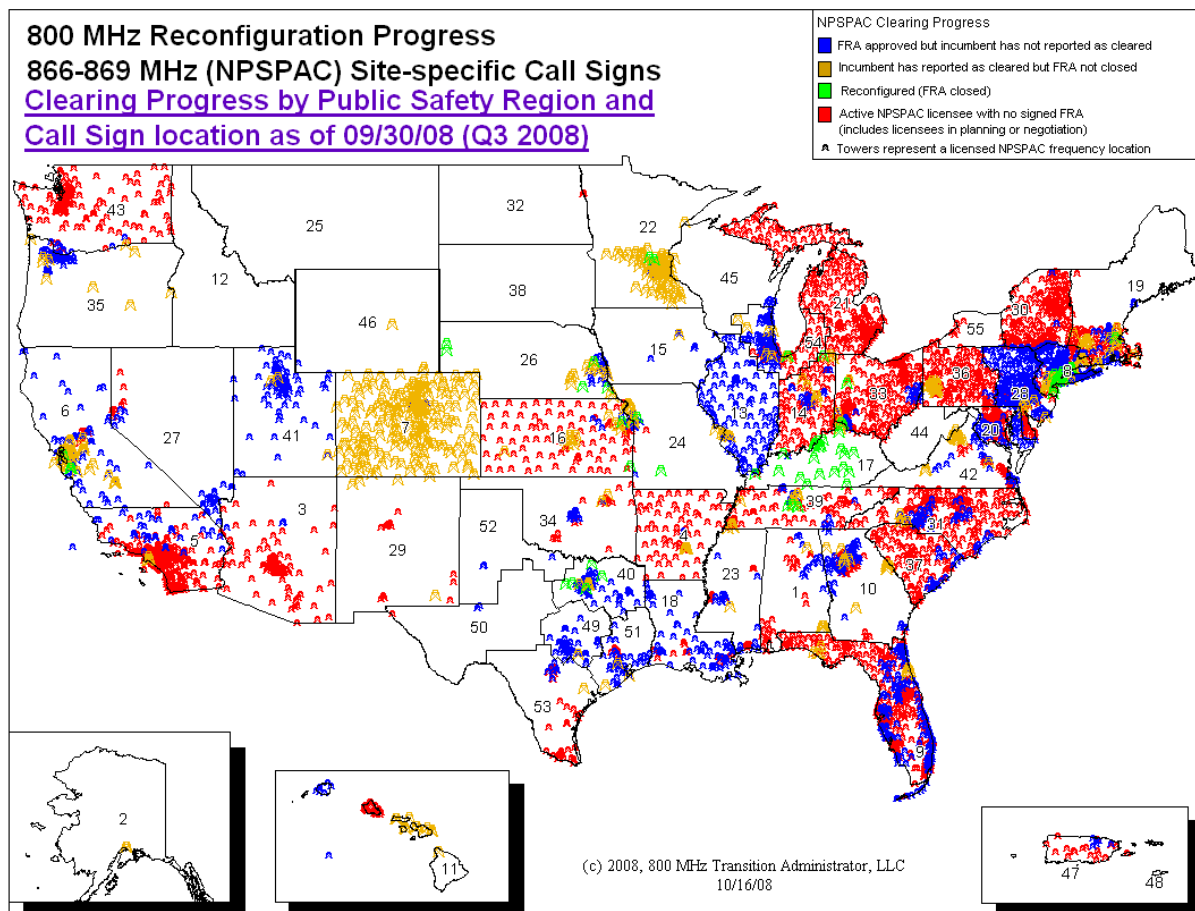

(iii) **Infrastructure Retuning and System Cutover**

Another significant milestone in the implementation process is the retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels. Of the 871 FRAs expected for Stage 2, there were 261 FRAs (an increase from 198 FRAs as of June 30, 2008) where Stage 2 licensees had completed the transition to their new channels as of September 30, 2008. As of September 30, 2008, physical reconfiguration was complete for 30 percent of non-border Stage 2 FRAs (an increase from 23 percent as of June 30, 2008).

As of September 30, 2008, 10.5 percent (up from 5.2 percent as of June 30, 2008) of the Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees, which includes call signs in the border areas.

Map 2 graphically depicts a geographic perspective of NPSPAC reconfiguration progress, as of September 30, 2008, by licensed NPSPAC locations. Progress on Expansion Band clearing is detailed in Appendix 2.

Map 2: NPSPAC Locations and Reconfiguration Status, by NPSPAC Region as of September 30, 2008

3. Canadian Border Regions

The 30-month transition period for reconfiguration by Canadian border region licensees began on October 14, 2008. Based on an evaluation of FCC Registration Numbers (“FRNs”) in the FCC’s Universal Licensing System (“ULS”) database, the number of Canadian border region licensees subject to reconfiguration is 334. This will generally translate to a smaller number of FRAs as several licensees have multiple FRNs, multiple licensees may join into a single FRA, and certain non-public safety licensees may be excluded based on frequency planning results. Of the 334 identified FRNs, 174 are related to Public Safety licensees and 160 are non-Public Safety licensees.

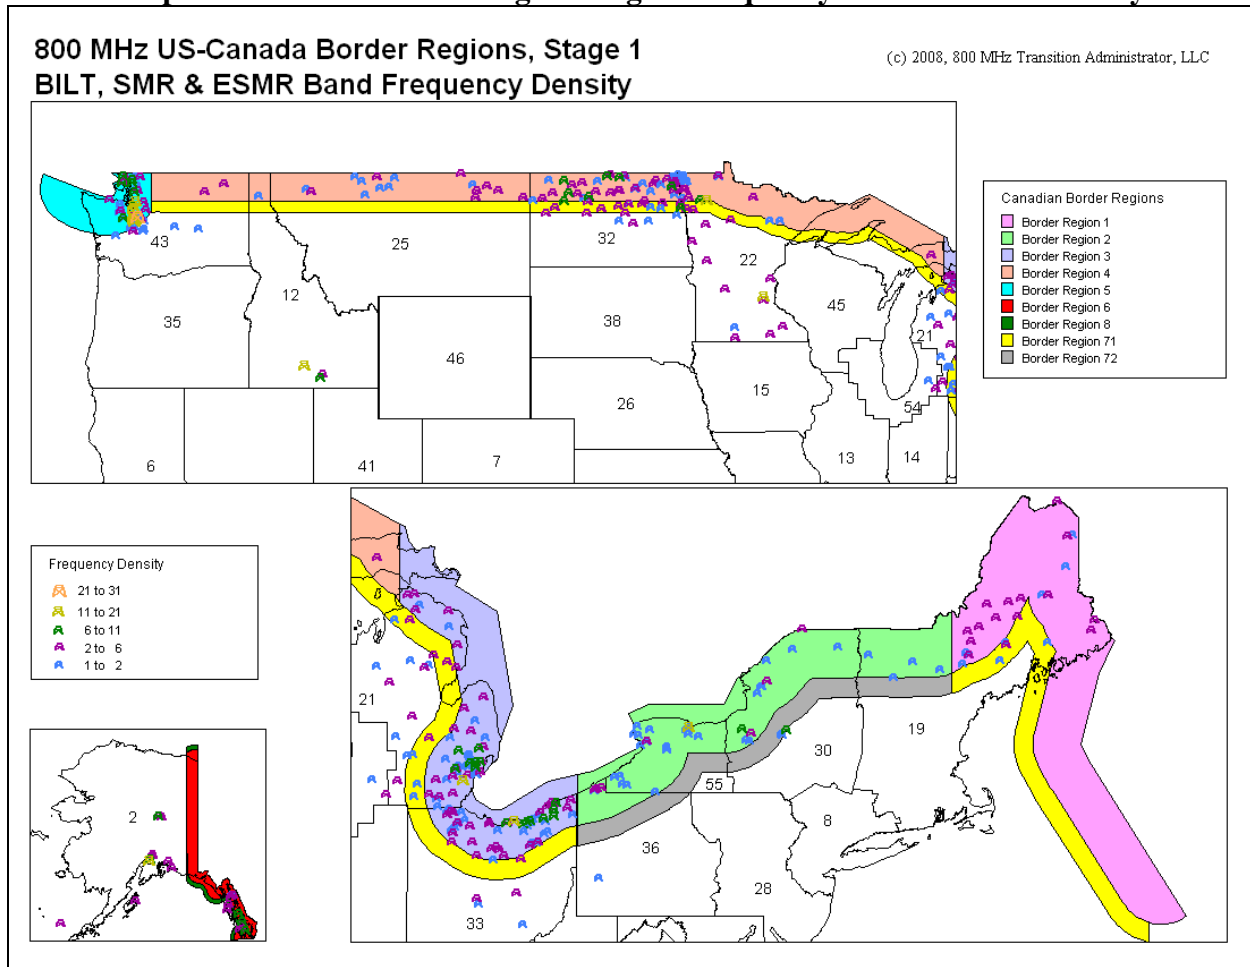

As of September 30, 2008, 20 PFAs, with a total contract value of \$5.5 million, were submitted to the TA by licensees in the Canadian border region or adjacent to the border regions.

In September 2008, the TA analyzed and proposed 1,192 replacement frequencies for Canadian border region Stage 1 licensees. The TA sent FPRs for a total of 344 Stage 1 call signs in early October 2008. The TA is currently analyzing replacement frequencies for Canadian border region Stage 2 licensees.

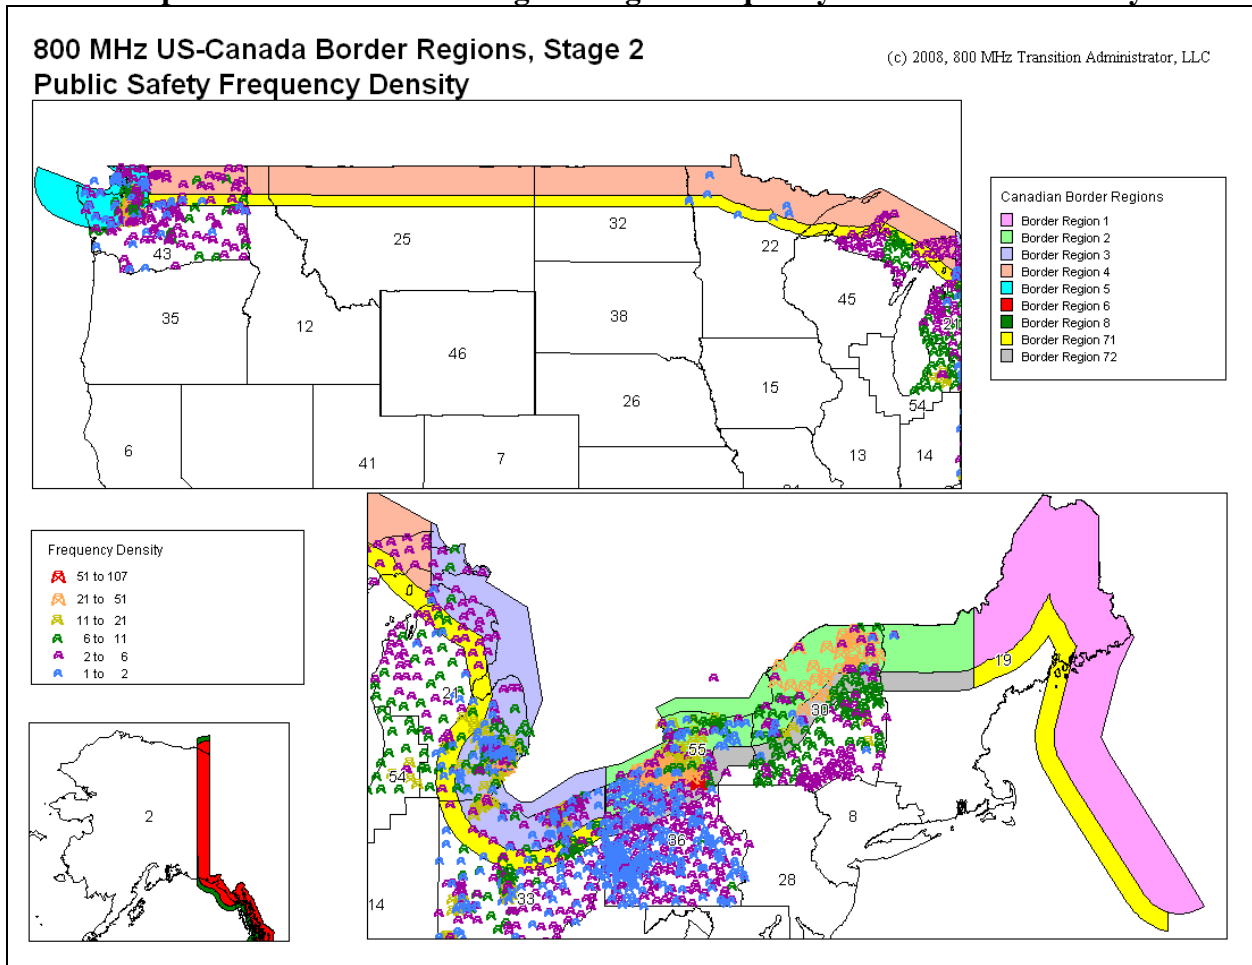

The maps below show the locations and frequency density of Stages 1 and 2 licensees in the Canadian border regions.³⁷

³⁷ Frequency density defines the number of distinct reconfiguring base station frequencies at the noted location. Locations and frequency counts are based on FCC ULS data.

Map 3: Canadian Border Region Stage 1 Frequency Locations and Density

Map 4: Canadian Border Region Stage 2 Frequency Locations and Density

In preparation for the mediation period for Canadian border region licensees, the TA reviewed and revised its training materials for TA Mediators to focus on the potential issues faced in this wave of mediations, such as border area frequency issues. As it has done prior to other mediation periods, the TA conducted additional training for TA Mediators during the third quarter.

As of September 30, 2008, one Canadian border region licensee requested and was referred to mediation.

B. Program Financial Information

This section provides information for the third quarter of 2008 regarding reconfiguration expenditures, letters of credit, 800 MHz incumbent licensee reviews, the external audit, and the TA's fees and expenses.

1. Reconfiguration Expenditures**a. 800 MHz Incumbent Licensee Reconfiguration Costs**

As of September 30, 2008, Sprint Nextel and incumbent licensees had executed FRAs and PFAs pursuant to TA-approved cost estimates totaling approximately \$503.3 million and Sprint Nextel had paid approximately \$217.6 million of this amount as advance payments and for work completed to date. This compares to \$417.2 million in executed FRAs and PFAs and \$173.9 million paid as of June 30, 2008.

Sprint Nextel has reported to the TA that it had incurred, on a cash basis, approximately \$635.5 million (through September 30, 2008) in costs for (a) payments made to incumbent licensees or their vendors in accordance with TA-approved agreements executed by incumbent licensees and Sprint Nextel; and (b) replacement equipment costs, including costs related to the development of software for certain incumbent licensee subscriber equipment that enables such subscriber equipment to be retuned rather than replaced and costs related to replacement equipment to be provided to incumbent licensees by Sprint Nextel (collectively “800 MHz Incumbent Licensee Reconfiguration Costs”). To date, Sprint Nextel had requested that the TA assess approximately \$251.1 million of the 800 MHz Incumbent Licensee Reconfiguration Costs (submitted as of June 30, 2008) for the purpose of determining whether those costs are creditable against the payment Sprint Nextel will make to the United States Treasury at the completion of reconfiguration (“Creditable Costs”). The TA has performed a review of approximately \$251.1 million in costs (submitted as of June 30, 2008). The status of these costs is as follows:

- \$198.0 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$53.1 million requires additional information from Sprint Nextel or incumbents to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$384.3 million of the 800 MHz Incumbent Licensee Reconfiguration Costs to the TA for credit assessment or for external audit.

b. Sprint Nextel Costs

Sprint Nextel has reported to the TA that it had incurred, on a cash basis, approximately \$275.2 million³⁸ (through September 30, 2008) in costs to support (a) incumbent licensee negotiations, (b) systems development costs for tracking and reporting of program activity, (c) Sprint Nextel’s program and financial management activities, (d) other program costs, and (e) reconfiguration of Sprint Nextel’s systems in the 800 MHz band (collectively “Sprint Nextel Costs”). The Sprint Nextel Costs exclude certain amounts incurred related to Sprint Nextel’s internal network costs that Sprint Nextel may submit for credit at a later date (“To Be

³⁸ Through June 30, 2008, this amount was \$306.6 million. The reduction is due to a change in reporting by Sprint Nextel of Schedule D Equipment payments.

Determined Sprint Nextel Costs”). To date, Sprint Nextel has requested that the TA assess approximately \$208.8 million of the Sprint Nextel Costs (submitted as of June 30, 2008) for the purpose of determining whether those costs are Creditable Costs. The TA has performed a review of approximately \$187.7 million in costs (submitted as of December 31, 2007). The status of these costs is as follows:

- \$27.5 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$160.2 million requires additional information from Sprint Nextel to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$66.4 million of the Sprint Nextel Costs or any of the To Be Determined Sprint Nextel Costs to the TA for credit assessment or for external audit.

c. **1.9 GHz Clearing Costs**

Sprint Nextel has reported to the TA that it has incurred approximately \$533.6 million in costs (through September 30, 2008) associated with reconfiguration of the 1.9 GHz band. These costs are reported for informational purposes only. The TA does not conduct a review of these costs.

d. **Estimated Total Reconfiguration Expenditures**

On November 7, 2008, Sprint Nextel filed its Form 10-Q filing for the quarterly period ended September 30, 2008 with the Securities and Exchange Commission (“SEC”) and disclosed that from the inception of the program through September 30, 2008, Sprint Nextel has incurred approximately \$1.6 billion of costs directly attributable to the spectrum reconfiguration program.³⁹

2. **Letters of Credit**

For the quarter ended September 30, 2008, Sprint Nextel made all its required payments to licensees and vendors. Accordingly, there has been no need to draw on the Letters of Credit through September 30, 2008. Sprint Nextel has reported to the TA that it had incurred, on a cash basis, approximately \$47.9 million (through September 30, 2008) in Letter of Credit Fees.

The TA is currently reviewing the \$2.078 billion Letters of Credit in view of the programmatic obligations satisfied through June 30, 2008 by Sprint Nextel. The TA does not

³⁹ See Sprint Nextel Corporation, Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2008, at 23 (filed Nov. 7, 2008), available at <http://www.sec.gov/Archives/edgar/data/101830/000119312508229874/d10q.htm>.

recommend a reduction or increase in the Letters of Credit at this time. The TA may subsequently recommend an adjustment to the Letters of Credit.

3. External Audit

In the third quarter of 2008, Reznick Group, the external auditors selected by the TA, commenced the annual audit of program expenditures for the year ended December 31, 2008 and for the period from inception (August 6, 2004) through December 31, 2008 (“the 2008 Audit”).

4. Transition Administrator

a. Fees, Expenses, and Staffing

The TA’s fees and expenses for the quarter ended September 30, 2008 were \$8.8 million in fees and \$0.1 million in expenses, for a total of approximately \$9 million, which is approximately \$0.8 million lower than the forecast for the third quarter. Additional details are provided in Appendix 9. TA staffing as of September 30, 2008 consisted of 69 Full Time Equivalents (“FTEs”).

The TA’s fees and expenses for the quarter ending December 31, 2008 are estimated at \$9.2 million in fees and \$0.1 million in expenses, for a total of \$9.3 million.

b. Disclosure of Non-Reconfiguration Fees

In accordance with the TA’s Independence Management Plan, the TA reports that BearingPoint received \$371,500 from Sprint Nextel in non-TA fees and costs for the quarter ended September 30, 2008.⁴⁰

5. Review and Status of Reconfiguration Completion Certifications

During the third quarter of 2008, an additional 21 PFA Completion Certifications were submitted to the TA, raising the total number received by the TA to 105.⁴¹ Of these, the TA had reviewed and certified 99 PFAs as complete, with the remaining six under review as of September 30, 2008. Appendix 8 contains a summary of PFAs that have closed as of September 30, 2008.

During the third quarter of 2008, an additional 55 FRA Completion Certifications⁴² were submitted to the TA, raising the total number received by the TA to 797.⁴³ Of these, the TA had reviewed and certified 780 FRAs as complete, with the remaining 17 under review as of

⁴⁰ See Independence Management Plan for the 800 MHz Transition Administrator Team Members (Version 1.1), WT Docket No. 02-55, at 4 (filed May 9, 2005).

⁴¹ Of these, 19 were for Stage 1 licensees and 86 were for Stage 2 licensees

⁴² From this point forward all subsequent information is related to FRA Completion Certifications only.

⁴³ Of these, 717 were for Stage 1 licensees and 80 were for Stage 2 licensees.

September 30, 2008. Appendix 8 contains a summary of FRAs that have closed as of September 30, 2008.

These completion certifications were filed as part of the closing process once all planning or reconfiguration implementation activities were completed. The TA has reviewed the amounts expended on planning activities and reconfiguration implementation activities covered by these PFAs and FRAs and concurs with the identified remaining payments due incumbent licensees or refunds due Sprint Nextel, pending any results of the TA's post-close review rights or external audit.

Sprint Nextel has provided the TA with the following data which describes the status of deals, in terms of numbers of FRAs in each stage of the contract closing process as of September 30, 2008.

Table 5: Status of FRAs in the Closing Process (after completion of physical reconfiguration)⁴⁴

Status of FRAs	Number
Closed FRAs	780
FRAs Pending TA Completion Certification Review	17
FRAs Pending in the Sprint Nextel Closing Process:	
Sprint Nextel Execution of the Completion Certificates	21
Sprint Nextel Receipt of Signed Completion Certificates from Incumbent Licensees	19
Sprint Nextel Preparation of Completion Certificates	19
Total FRAs in the Sprint Nextel Closing Process	59
FRAs Pending in the Actual Cost Reconciliation Process:	
Sprint Nextel Pending Receipt of Signed Reconciliation Statement	44
Sprint Nextel Waiting for Receipts and Preparing Actual Cost Reconciliation Statement	127
Sprint Nextel Preparing Request for Receipt Letter	20
Total FRAs in the Actual Cost Reconciliation Process	191
FRAs not in the above Closing or Actual Cost Reconciliation Processes:	
Finalization of either certain Reconfiguration Project Management activities or Requisite Regulatory Filings	7
Completion of the Actual Cost Reconciliation and either Finalization of certain Reconfiguration Project Management activities or Requisite Regulatory Filings	35
Completion of the Actual Cost Reconciliation, Requisite Regulatory Filings, and certain Reconfiguration Project Management activities	42
Total FRAs not in the above Closing or Actual Cost Reconciliation Processes	84
Total FRAs for which physical reconfiguration is complete	1131

The TA has observed significant lags between completing physical reconfiguration and completing all necessary filings with the FCC and processing Completion Certifications through Sprint Nextel and the TA. For the closed FRAs (including those pending TA review), the average elapsed time between the completion of the physical reconfiguration and completion of the closing process was 7.7 months as of September 30, 2008 (compared to 7.5 months for the period ending June 30, 2008). For FRAs that have not yet closed, the average outstanding

⁴⁴ Sprint Nextel is the data source for this table.

elapsed time from completion of the physical reconfiguration as of September 30, 2008 is 12.5 months (compared to 11.5 months as of June 30, 2008).

As of September 30, 2008, the major area of delay was the Actual Cost Reconciliation Process which accounts for 58 percent of the FRAs that have completed the physical reconfiguration but are not yet closed. Of the 191 FRAs in the Actual Cost Reconciliation Process, 124 (65 percent) of the FRAs have been in this same stage for three months or longer. The status of deals, in terms of numbers and percentage of FRAs outstanding in the Actual Cost Reconciliation Stage is listed in the table below.

Table 6: Status of Outstanding FRAs in the Actual Cost Reconciliation Stage (after completion of physical reconfiguration but prior to closing)⁴⁵

Outstanding for	Number of FRAs	Percentage of the Total FRAs in the Actual Cost Reconciliation Process
Less than 3 Months	67	35%
3 to 6 Months	25	13%
6 to 9 Months	21	11%
9 to 12 Months	11	6%
12 Months or Longer	67	35%

The average time to complete the Actual Cost Reconciliation under an FRA once the physical reconfiguration was completed continues to be impacted by delays in processing Change Notices by the incumbent licensee and Sprint Nextel. Another factor is delays in incumbent licensees submitting to Sprint Nextel complete, accurate, and/or timely information required for the Actual Cost Reconciliation to substantiate Actual Costs incurred. Sprint Nextel delays in administering the Actual Cost Reconciliation Process also have contributed to the overall time lag between completion of physical reconfiguration and closing. The TA encourages licensees and Sprint Nextel to strive to complete these activities in a more timely manner. To minimize the effort and times associated with the closing process, incumbent licensees are strongly encouraged to review the following TA guidance, *Change Notice Process Fact Sheet*, *Actual Cost Reconciliation Fact Sheet*, and *Incumbent Labor Reimbursement Policy*, which are available on the TA's website at www.800TA.org. In addition, the TA has developed an Actual Cost Reconciliation Webinar to assist licensee's understanding of the process from start to finish. The TA will continue to monitor the closing process.

C. Specialized Support Functions

This section outlines additional information about TA activities that support the program, such as the Contact Center, the website, training, outreach, and FRA review.

To facilitate successful 800 MHz band reconfiguration, licensees and other stakeholders must have rapid and consistent access to accurate reconfiguration information, processes, and procedures. As such, the TA executes an approach that is intended to engage, educate, and equip

⁴⁵ Sprint Nextel is the data source for this table.

the impacted stakeholders with the knowledge necessary to plan and implement reconfiguration activities. The TA employs a multi-pronged approach, including direct calling campaigns, conference and event attendance (“Stakeholder Outreach”), Webinars (online training seminars), and interaction with industry press to accomplish these goals.

1. Stakeholder Inquiries

The TA maintains a “Contact Center” to receive and process questions and requests for information regarding reconfiguration and the TA’s activities. The TA receives inquiries from a variety of stakeholders: licensees, vendors, consultants, associations, and the trade press. During the third quarter, the TA received a total of 5,565 inquiries to the Contact Center (1,929 in July 2008; 1,552 in August 2008; and 2,084 in September 2008). Access to the Contact Center is critically important to ensure that licensees and other stakeholders are able to obtain information to prepare for and implement the reconfiguration of their systems.

2. TA-Produced Materials and the TA’s Website

During the third quarter, the TA continued to distribute informational materials to stakeholders relating to the reconfiguration process, including fact sheets, licensee forms, direct mailings, and other materials as listed below. Many of these items are posted on the TA’s website (www.800TA.org).

- Canadian Border Region – Developed a dedicated section on the TA’s website containing information about reconfiguration in the Canadian border region, including Canadian border region questionnaire submission guidelines; Frequency Reconfiguration Presentations; Frequency Proposal Report Fact Sheet; and updated FAQs related to the Canadian border region.
- Fact Sheets – Created and posted a Reconfiguration Completion Checklist.
- Implementation Planning Sessions – Updated the calendar on the TA’s website to reflect previous and future scheduled Implementation Planning Sessions.
- Mail campaigns – Targeted mailings to licensees in reference to Expansion Band Election Approvals, Special Temporary Authority requests and Expectations letters designed to identify next steps for licensees after an approved FRA. Additionally, general information and specific questionnaires were sent to Canadian border region licensees. Meeting invitations were sent to Canadian border region licensees in Ohio, Michigan, and New York to assist licensees with completing the questionnaire and explain the border frequency reconfiguration band plan, and the RFPF process and deadlines.
- TA Alerts – TA Alerts are the TA’s listserv feature, which allows website visitors to sign up to receive emails from the TA with the latest updates and news. TA Alerts are sent when changes or updates are made to the website, when the FCC releases an Order or Public Notice, and/or when the TA has an announcement. There are 313 active subscribers for TA Alerts to date. In the third quarter, the following TA Alerts were released: “The FCC’s July 14, 2008 Waiver Update” (7/16/08), “Updated Guidance for CBR Licensees” (8/25/08), “Updated Presentation for CBR licensees”

(9/12/08), and “Quarterly Report Published for the Quarter Ended June 30, 2008” (9/29/08).

These new or modified materials, in addition to materials previously published, are intended to provide stakeholders with sufficient information to effectively plan, negotiate, and implement reconfiguration.

During the third quarter, the TA also submitted written articles to various Public Safety communications publications as another medium to communicate with licensees and to educate those involved in the rebanding process.

The TA’s website is a significant component of the Stakeholder Outreach efforts. During the third quarter, updates were made to the TA’s website to post and advertise new and updated TA-produced materials and to post copies of FCC Public Notices and Orders. The TA’s website received an estimated 8,143 visits during the third quarter.⁴⁶

3. Outreach Events and TA-Sponsored Education and Training

a. Webinars

The TA has continued to conduct Webinars that provide information on all facets of reconfiguration. The Webinar series to date has totaled 50 sessions with 1,065 attendees across stakeholder groups. In the fourth quarter, the TA is scheduled to offer Webinars on the Actual Cost Reconciliation Process and Preparing for an Implementation Planning Session.

Webinars have proven to be an effective, low-cost method for reaching wide audiences and providing interactive and just-in-time guidance. The TA solicited feedback following each delivery. According to participant surveys, reaction to the Webinars has been overwhelmingly positive, with participants indicating that the opportunity for live discussion is the most helpful aspect.

b. Licensee Outreach Campaigns

In an effort to further the progress of reconfiguration, the TA continued its communication and outreach efforts this quarter. Specifically, the TA utilized a two-phase targeted outbound campaign relating to Canadian border region licensees, which consisted of informational mailings related to the Canadian border band plan, questionnaires specific to the unique needs of Canadian border region public safety licensees, and a targeted telephone outreach effort in an attempt to verify point of contact information and assist the reconfiguration effort.

The TA also hosted informational sessions for Canadian border region licensees in Ohio, Michigan, and New York, providing guidance around topics such as the questionnaire, Frequency Reconfiguration Band Plan, and Requests for Planning Funding.

⁴⁶ The TA has adopted “visits” instead of “hits” as a more accurate metric to utilize in identifying website traffic.

4. Frequency Reconfiguration Agreement Review

The TA continues to meet its service level goals for reviewing FRAs.⁴⁷ Detailed information about the time required by the TA to review and approve Stages 1 and 2 FRAs submitted to the TA is available in Appendices 6 and 7.

⁴⁷ The TA's service level targets for FRA review are review of 80 percent of FRAs within 5 business days, 95 percent within 10 business days, and 100 percent within 15 business days.

III. APPENDICES

Appendix 1

Status of Negotiations for Licensees in Channels 1-120: Milestones Completed by Number of Frequency Reconfiguration Agreements, Per Wave, Per Region, as of September 30, 2008

Notes:

- a. Data for Channels 1-120 call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. Data includes call signs in the international border area. Data may change depending upon border area band plans.
- c. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- d. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.
- e. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- f. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- g. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

The licensee clearing information is provided by Sprint Nextel. Regions adjacent to international borders will not reach 100 percent until revised border area band plans are available.

Notes:

- a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. Data includes call signs in the international border area. Data may change depending upon border area band plans.
- c. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- d. Data includes call signs with fixed locations authorized for frequencies in the Expansion Band with adequate geographic data to determine a Public Safety Region.
- e. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- f. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- g. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

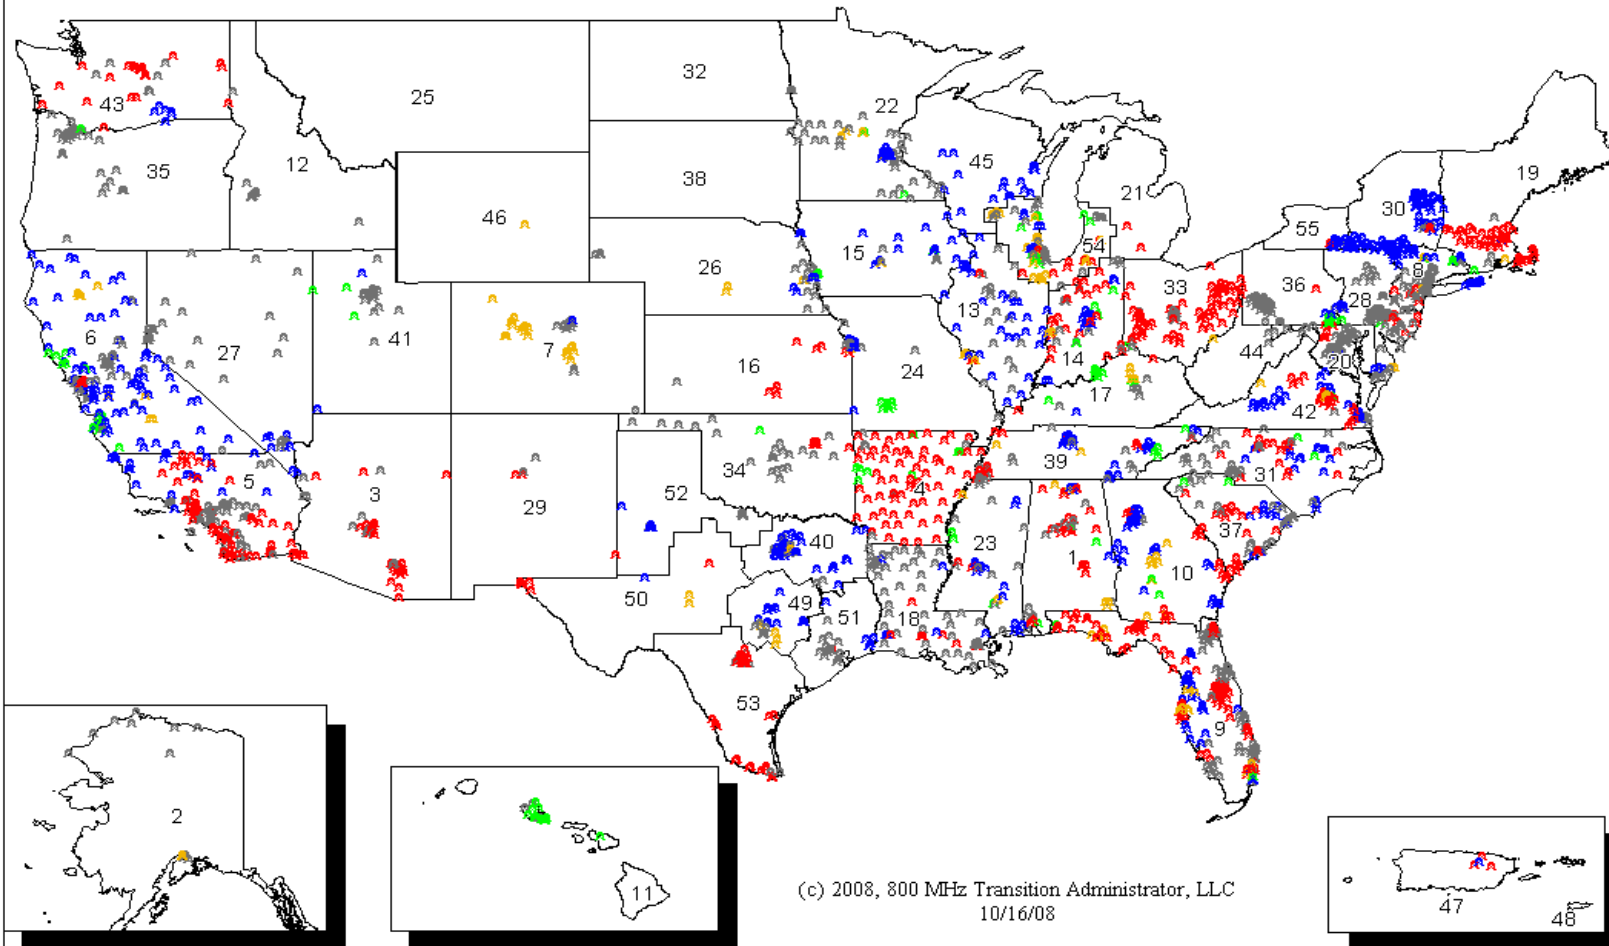

800 MHz Reconfiguration Progress

Expansion Band Site-specific Call Signs

Clearing Progress by Public Safety Region and Call Sign location as of 09/30/08 (Q3 2008)

Expansion Band clearing progress

- FRA approved but incumbent has not reported as cleared
- Incumbent has reported as cleared but FRA not closed
- Reconfigured (FRA closed)
- Active EB license with no signed FRA
- Elected to stay/Canceled or assigned to Nextel without FRA
- ▲ Towers represent a licensed Expansion Band frequency location

Notes:

- Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- Data includes call signs in the international border area. Data may change depending upon border area band plans.
- The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- Data includes call signs with fixed locations authorized for frequencies in the 866-869 MHz range, and those with adequate geographic data to determine a Public Safety Region.
- Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- As of the second quarter of 2007, the NPSPAC call sign data includes STA NPSPAC call signs and call signs without fixed locations (e.g., mobile-only authorizations).
- Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

- The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- Data includes call signs with fixed locations authorized for frequencies in the Southeast ESMR Band with adequate geographic data to determine a Public Safety Region.
- Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

** For Non-Canadian Border PSR 15, a call sign has frequencies in both PSR 15 and PSR 22. The reconfiguration of the frequencies on this call sign in PSR 22 necessitated the reconfiguration of the same frequencies in PSR 15.

Notes:

- * Public Safety Region (PSR) includes call signs in the international border area. Data may change depending upon border area band plans.
- a. Data for Channels 1-120 call signs excludes call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts are not going to be submitted to the TA for review and approval for Sprint Nextel credit. Data for Expansion Band call signs excludes call signs under prior contract and call signs for which licensees have elected not to reconfigure.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data for Channels 1-120 call signs includes call signs with at least one primary fixed location authorized for frequencies the 851-854 MHz range with adequate geographic data to determine a PSR. Expansion Band data includes call signs with at least one primary fixed location in the Expansion Band, as the Expansion Band may be defined inside and outside the Southeast ESMR region, with adequate geographic data to determine a PSR. NPSPAC data includes call signs with fixed locations in the 866-869 MHz range with adequate geographic data to determine a PSR. Southeast ESMR Band data includes call signs with fixed locations in the 858.5-862 MHz range within the Southeast ESMR region and with adequate geographic data to determine a PSR. Call signs with locations in multiple PSRs are counted for each PSR. Call signs are counted within every PSR for which they have a fixed primary location.
- d. Data has been adjusted to reflect the change in the band plan in the Atlanta area pursuant to the FCC's October 5, 2005 Memorandum Opinion and Order.
- e. STA call signs are excluded from this analysis. The TA does not generally send FPRs for STA call signs unless requested by the licensee for the purposes of planning funding or contract negotiation.
